Just like Mendel observed generations of related pea plants to determine the mode of inheritance for flower color and other physical traits, scientists can examine generations within a family and discover the mode of inheritance for human traits. To do this, scientists create family trees, called pedigrees, showing as many generations of a family as they can and marking who had which phenotype.

The Creation Museum, located in Petersburg, Kentucky, United States, is operated by the Christian creation apologetics organization Answers in Genesis (AiG). It promotes a pseudoscientific, young Earth creationist (YEC) explanation of the origin of the universe based on a literal interpretation of the Genesis creation narrative in the Bible.. The 75,000-square-foot (7,000 m²) museum cost US ...
